

Special Issue on Chromatographic Analysis and Its Applications

Call for Papers

Chromatography, technique for separating the components, or solutes, of a mixture on the basis of the relative amounts of each solute distributed between a moving fluid stream, called the mobile phase, and a contiguous stationary phase. The mobile phase may be either a liquid or a gas, while the stationary phase is either a solid or a liquid. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Chromatographic Analysis and Its Applications**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Chromatographic Analysis and Its Applications**. In this special issue, potential topics include, but are not limited to:

- Techniques by chromatographic bed shape
- Techniques by physical state of mobile phase
- Supercritical fluid chromatography
- Reversed-phase chromatography
- Hydrophobic interaction chromatography
- Chiral chromatography
- Assessment of accuracy in chromatographic analysis
- Chromatographic analysis of the environment
- Applications of chromatographic analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Chromatographic Analysis and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 25th, 2021
Publication Date	September 2021

Guest Editor:

Scientific Research
Open Access

**American Journal of Analytical
Chemistry**

ISSN Online: 2156-8278
