**Special Issue on**

**Impacts of Climate Change on Environment and Ecology**

**Call for Papers**

Climate change and its social, environmental, economic and ethical consequences are widely recognized as the major set of interconnected problems facing human societies. Its impacts and costs will be large, serious, and unevenly spread, globally for decades.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **impacts of climate change on environment and ecology**. Potential topics include, but are not limited to:

- Prediction of future climate change
- Drought, rainstorm, hurricanes, and other climatic extreme events
- Climate Impacts on ecosystem
- Climate Impacts on agriculture
- Desertification management
- Land use and climate change
- Climate change mitigation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Impacts of Climate Change on Environment and Ecology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 28th, 2017
Publication Date	June 2017

**Guest Editor:**
