

Special Issue on Mitigation and Adaptation Strategies for Climate Change

Call for Papers

Both adaptation and mitigation are essential to reduce the impacts of climate change. Mitigation measures are those actions that are taken to reduce and curb greenhouse gas emissions, while adaptation measures are based on reducing vulnerability to the effects of climate change. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **mitigation and adaptation strategies for climate change**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **mitigation and adaptation strategies for climate change**. Potential topics include, but are not limited to:

- Practice Energy efficiency
- Greater use of renewable energy
- Efficient means of transport implementation
- Carbon tax and emissions markets
- Landscape restoration (natural landscape) and reforestation
- Flexible and diverse cultivation to be prepared for natural catastrophes
- Research and development on possible catastrophes, temperature behavior
- Preventive and precautionary measures

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Mitigation and Adaptation to Climate Change**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 15th, 2019
Publication Date	September 2019

Guest Editor:

Scientific Research
Open Access

**American Journal of
Climate Change**
ISSN Online: 2167-9509
