

Special Issue on Climate Change and Agriculture

Call for Papers

The global needs to reduce its greenhouse gas emissions from agriculture and adapt its food-production system to cope with climate change. Faced with growing global demand and competition for resources, the global food production and consumption need to be seen in a broader context, linking agriculture, energy, and food security. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **climate change and agriculture**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **climate change and agriculture**. Potential topics include, but are not limited to:

- Climate change impacts on crops
- Climate change impacts on livestock
- Climate change impacts on fisheries
- Climate change impacts on food supply
- Greenhouse gas emissions in Agriculture sector
- Soil carbon sink

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Climate Change and Agriculture**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 8th, 2023
Publication Date	February 2024
