

Special Issue on
Industrial Economics and Sustainable Development
Call for Papers

Industrial Economics and Sustainable Development studies the science of sustainable production and consumption by developing a comprehensive, integrated approach to sustainability and resilience assessment. Sustainable development is a process for meeting development goals while sustaining the ability of natural systems to continue to provide the natural resources and ecosystem services upon which the economy and society depends. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of industrial economics and sustainable development.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Industrial Economics and Sustainable Development**. Potential topics include, but are not limited to:

- Economic sustainability
- Low carbon economy
- Green economy
- Ecological economics
- Environmental economics
- Sustainable energy
- Sustainability measurement
- Resource recycling

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Industrial Economics and Sustainable Development**” should be selected during your submission.

Special Issue Timetable:
