

Special Issue on Endangered Plant Protection

Call for Papers

An endangered plant is a plant facing a very high risk of extinction. There are currently 2655 plants classified as Endangered worldwide. The loss of plant life is extremely important to the human race. The endangered or threatened plant require continuing species specific wildlife management intervention to survive even when self-sustaining population recovery goals are achieved. Now many nations have laws offering protection to conservation reliant species: for example, restricting land development or creating preserves.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Endangered Plant Protection**.

Authors should read over the journal's [Author Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue- Endangered Plant Protection**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 10th, 2013
Publication Date	June, 2013
