

## Special Issue on Advances in Angiosperms Research

### Call for Papers

This special issue on “**Advances in Angiosperms Research**” will be focusing on the latest development in angiosperms. Angiosperms, also known as flowering plants, are the most diverse group of land plants, they are seed-producing plants just like the gymnosperms and can be distinguished from the gymnosperms by a series of characteristics such as flowers, endosperm within the seeds, and the production of fruits that contain the seeds. As one of the most important research fields of plant research, **angiosperms** are of great attractions to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **angiosperms**. Potential topics include, but are not limited to:

- Seed-producing plants
- Endosperm
- Monocots
- Compositae
- Leguminosae
- Self-incompatibility

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Advances in Angiosperms Research**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 2nd, 2014
Publication Date	June 2014

#### Guest Editor:

Prof. **Li-zhi Gao**

Chinese Academy of Sciences, China
