

Special Issue on Flower

Call for Papers

This special issue on “**Flower**” will be focusing on the latest development in plant sciences and technology. A Flower is the reproductive structure of angiosperm. The biological function of a flower is to combine male sperm with female egg cells. This process begins with pollination, followed by fertilization, thus producing seeds to be disseminated. Furthermore, **flowers** have been used to beautify environment, as a source of food and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **flower**. In this special issue, potential topics include, but are not limited to:

- Flowering and flower development
- Morphology
- Floral function
- Pollination
- Fertilization and dispersal
- Evolution
- Usage of flowers

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Flower**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 16th, 2014
Publication Date	February 2015
