

Special Issue on Legume

Call for Papers

A **Legume** is a plant of the family Leguminosae or the seed of the plant. Legumes are widely used as food, livestock forage, silage, soil-enhancing green manure and so on. Legumes have important economic significance, they are important source of protein, oil and vegetables. In addition, the symbioses between rhizobium and legumes make a great contribution to nitrogen-fixing. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **legume**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **legume**. In this special issue, potential topics include, but are not limited to:

- Biological nitrogen fixation
- Evolution, phylogeny and taxonomy
- Economic and cultural importance
- Production in agriculture
- Nutritional facts
- Physiology, molecule and biochemistry
- Breeding of legumes

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Legume**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 7th, 2015
Publication Date	March 2015
