

Special Issue on Tropical Plants

Call for Papers

Tropical Plants are plants which are native to the tropical regions of world. Some tropical areas may receive abundant rain the whole year round, but others have long dry seasons which last several months and may vary with geographic location. These seasonal droughts have great impact on the vegetation.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **tropical plants**. Potential topics include, but are not limited to:

- Ecosystems
- Phytochemistry
- Phytopathology
- Phylogenetics
- Plant genetics
- Physiology
- Dendrochronology
- Biotechnology applications
- Ethnobotanical importance

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Tropical Plants**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 29th, 2016
Publication Date	April 2016
