

## Special Issue on Plant Pathology Research

### Call for Papers

**Plant Pathology** is the scientific study of diseases in plants caused by pathogens and environmental conditions. Organisms that cause infectious disease include fungi, oomycetes, bacteria, viruses, viroids, virus-like organisms, phytoplasmas, protozoa, nematodes and parasitic plants.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **plant pathology**. Potential topics include, but are not limited to:

- Pathogen identification
- Disease etiology
- Disease cycles
- Disease epidemiology
- Plant disease resistance
- Economic impact
- Plant diseases affect humans and animals
- Plant diseases management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Pathology Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 26th, 2016
Publication Date	March 2016
