

## Special Issue on Plant Hormones Research

### Call for Papers

**Plant Hormones** (also known as phytohormones) are chemicals that shape the plant, affecting seed growth, time of flowering, the sex of flowers, senescence of leaves, and fruits. They affect which tissues grow upward and which grow downward, leaf formation and stem growth, fruit development and ripening, plant longevity, and even plant death.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **plant hormones research**. Potential topics include, but are not limited to:

- Plant hormones and plant growth regulators
- Absciscic acid
- Auxins
- Cytokinins
- Ethylene
- Gibberellins
- Other known hormones
- Hormones and plant propagation
- Transportation and storage of nutrients
- Plants respond to external stimuli
- Potential medical applications of plant hormones

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Hormones Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 24th, 2016
Publication Date	July 2016
