

Special Issue on Plant, Soil and Environment

Call for Papers

The characteristics of soil play a big part in the plant's ability to extract water and nutrients. If plants are to grow to their potential, the soil must provide a satisfactory environment for plant growth.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **plant, soil and environment**. Potential topics include, but are not limited to:

- Plant development, growth and productivity
- Agriculture, soil and environment interactions
- Soil evaluation and classification
- Soil and water conservation
- Fertilizers and soil fertility
- Soil structure and plant growth
- Soil microbiology
- Soil management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant, Soil and Environment**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 30th, 2016
Publication Date	January 2017
