
Special Issue on Wheat

Call for Papers

Wheat is a grass widely cultivated for its seed, a cereal grain which is a worldwide staple food. World trade in wheat is greater than for all other crops combined. In 2016, world production of wheat was 749 million tonnes, making it the second most-produced cereal after maize.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **wheat**. Potential topics include, but are not limited to:

- Genetics
- Wheat breeding
- Pests and wheat diseases
- Wheat production and consumption
- Nutrition and health effects
- World markets and trade

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Abiotic Stress**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 30th, 2017
Publication Date	October 2017
