

Special Issue on Weeds

Call for Papers

Weeds are a class of grass or plants which are unwanted or even harmful especially for farm fields. Weeds may be unwanted for a number of reasons. An important one is that they interfere with crops in agriculture, where in they must be controlled in order to prevent lost or diminished crop yields. Nevertheless, a number of weeds may be used for food or herbal medicine, and some weeds also possess valuable status in ecological environment.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **weeds**. Potential topics include, but are not limited to:

- Characteristics and species of weeds
- Weed biology
- Weed control
- Problems between weeds and crops
- Herbicides
- Weed of cultivation
- Fodder & Feed
- Benefits of weeds

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Weeds**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 15th, 2017
Publication Date	November 2017
