
Special Issue on Plant Tissue Culture

Call for Papers

Plant Tissue Culture technology has been widely used for large scale plant multiplication. Apart from their application in research, plant tissue culture techniques have become the major way of plant propagation, disease elimination, plant improvement and production of secondary metabolites.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **plant tissue culture**. Potential topics include, but are not limited to:

- Plant tissue culture technology
- Choice of explants, tissue culture medium and condition
- Protoplast fusion, haploid and polyploidy
- Embryo culture and hairy root cultures
- Genetic transformation
- Plant regeneration and cell totipotency
- Applications and prospect

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Tissue Culture**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 22nd, 2017
Publication Date	November 2017
