

Special Issue on Plant Ecology

Call for Papers

Plants are one of the densest ecotypes with vicariate diversity in their life history depending on their mores. The ecology of land entirely depends upon plants as they are practical pioneers of the planet earth. Initiating from microorganisms to the macroorganism, they meet their living requisites expending plants. Admitting this, different vegetation types, such as grassland and timberland, are major biomes which help to flux the environmental shifts under global impact. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **plant ecology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **plant ecology**. In this special issue, potential topics include, but are not limited to:

- Plant distribution
- Vegetation geography
- Plant and climate
- Different vegetation types
- Biological interactions
- Plant community

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Plant Ecology**” should be selected during your Submission.

Special Issue timetable:

Submission Deadline	March 18th, 2020
Publication Date	May 2020
