

## Special Issue on Plant Biotechnology

### Call for Papers

Agricultural biotechnology is a science that allows plant breeders to make precise genetic changes to place beneficial traits – such as pest resistance, disease resistance or herbicide tolerance – into plants. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Plant Biotechnology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Plant Biotechnology**. In this special issue, potential topics include, but are not limited to:

- Molecular biology, genetics
- Biochemistry,
- Cell and tissue culture
- Metabolic engineering
- Enomics, proteomics, and metabolomics
- Biotechnology applications in plant science
- Biotechnology applications in pathology and agriculture biology
- Applied research in plant biotechnology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Plant Biotechnology**” should be selected during your Submission.

Special Issue timetable:

Submission Deadline	March 21st, 2023
Publication Date	May 2023
