

## Special Issue on Plant Pathology

### Call for Papers

Plant Pathology refers to the scientific study of plant diseases. It encompasses the understanding of the causes, development, and management of diseases that affect plants. This field of research focuses on studying the interactions between plants and various pathogens, including bacteria, viruses, fungi, and nematodes, as well as abiotic factors that contribute to plant diseases. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **plant pathology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **plant pathology**. In this special issue, potential topics include, but are not limited to:

- Pathological analysis
- Plant pathogens
- Plant disease epidemiology
- Physiological plant disorders
- Molecular methods in plant disease diagnostics
- Disease resistance
- Plant-microbe interactions
- Integrated pest management
- Plant health and biosecurity
- Management of plant diseases

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Plant Pathology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 29th, 2024
Publication Date	March 2024

**Guest Editor:**
