# Table of Contents

**Volume 4    Number 2**

**June 2014**

## **New Method of Givens Rotations for Triangularization of Square Matrices**

A. M. Grigopryan.....65

## **On the Spectral Characterization of $H$ -Shape Trees**

S. B. Hu.....79

## **Generalized Inversions of Hadamard and Tensor Products for Matrices**

S. Saitoh.....87

## **A Further Result on the Cyclic Subspace**

H. L. Wang.....96

## **Numerical Quadratures Using the Interpolation Method of Hurwitz-Radon Matrices**

D. J. Jakóbczak.....100

## **Non-Singularity Conditions for Two $Z$ -Matrix Types**

S. Miura.....109

## **Proving and Extending Greub-Reinboldt Inequality Using the Two Nonzero Component Lemma**

M. Seddighin.....120

## **A New Expression for Rhotrix**

A. Mohammed.....128

## **Generalized Form of Hermite Matrix Polynomials via the Hypergeometric Matrix Function**

R. S. Batahan.....134

**Advances in Linear Algebra & Matrix Theory (ALAMT)** is an international journal dedicated to the latest advancement of linear algebra. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Linear Algebra.

## Subject Coverage

The journal publishes original papers including but not limited to the following fields:

- Linear Algebra and Its Applications
- Linear Algebra in Engineering and Computing
- Matrix Theory and Its Applications
- Numerical Linear Algebra with Applications
- Solutions of Linear Equations
- Special Types of Matrices
- Spectral Theory

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submission, please access the website.

## What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

## What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
