

Special Issue on Game Theory

Call for Papers

Game Theory is the formal study of conflict and cooperation. Game theoretic concepts apply whenever the actions of several agents are interdependent. These agents may be individuals, groups, firms, or any combination of these. Game theory attempts to look at the relationships between participants in particular model and predict their optimal decisions. Today, game theory is widely applied in economics, political science, psychology, computer science, and biology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **game theory**. Potential topics include, but are not limited to:

- Representation of games
- Game theory and strategy
- Applications of game theory
- Strategic and extensive form games
- Nash equilibrium
- Mixed strategies
- Zero-sum games and computation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Game Theory**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 29th, 2015
Publication Date	November 2015
