

Special Issue on Semigroup Theory and Applications

Call for Papers

A semigroup is an algebraic structure that is consisted of a set together with an associative binary operation. A semigroup with an identity is called a monoid. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Semigroup Theory and Applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Semigroup Theory and Applications**. Potential topics include, but are not limited to:

- Algebraic structures
- Bicyclic semigroups
- Cancellative semigroups
- Commutative algebra
- Empty semigroups
- Free semigroup
- Group of fractions
- Inverse semigroups
- Quasigroup
- Regular semigroups
- Transformation semigroups

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Semigroup Theory and Applications**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 12th, 2024
Publication Date	June 2024
