Advances in Pure Mathematics (APM) is an international journal dedicated to the latest advancement of ordered algebraic structures. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of ordered algebraic structures.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

Applied Harmonic Analysis	Fractional Analysis	Partial Differential Equations
Approximation Theory	Functional Differential Equations	Probability
Asymptotic Methods	Fuzzy Mathematics	Reaction-Diffusion Problems,
Bifurcation Theory	Geometry of Banach Spaces	Discrete Mathematics
Coding Theory	Integral Equations	Scattering Theory
Combinatorics	Mathematical Biology, Including Population Dynamics	Semigroups of Operators
Complex Analysis	Mathematical Physics	Signal Theory
Convex Analysis	Matrix Theory	Special Functions
Difference Equations	Moment Theory	Statistics
Differential Equations	Number Theory	Stochastic Process
Dynamical Systems	Numerical Analysis	Topology and Applications
Fixed-Point Theory	Operator Theory	Transport Theory
Fourier Analysis	Optimal Control	Ultrametric Analysis
Fractals	Optimization; Wavelets	Variational Methods

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the APM.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
