

Special Issue on Agricultural Machinery

Call for Papers

Agricultural Machinery research is the study of machinery and equipment used in agricultural processes and practices. It involves the design, development, and improvement of machinery to increase efficiency, productivity, and sustainability in the agricultural sector. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Agricultural Machinery**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Agricultural Machinery**. In this special issue, potential topics include, but are not limited to:

- Theoretical analysis and modeling in all technical aspects of agricultural machinery and equipment
- Farm machinery
- Agricultural robotics
- Agricultural processing
- Animal husbandry and fishery
- Autonomous agriculture vehicles
- Agricultural engineering systems with environmental consideration and sustainable production
- New technology and the future

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Agricultural Machinery**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 10th, 2024
Publication Date	March 2024
