

Special Issue on Crop Biology

Call for Papers

Crop Biology research focuses on the study of crop plants, their growth, development, and interactions with the environment. It involves understanding the biology of crop plants at various levels, from genes and molecules to whole plant physiology and ecology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Crop Biology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Crop Biology**. In this special issue, potential topics include, but are not limited to:

- Plant genetics and breeding
- Plant physiology
- Plant pathology
- Plant nutrition
- Crop ecology
- Crop management
- Physiological and growth response of crops
- Horticultural crop secondary metabolism
- Physiological and growth response of crops

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Crop Biology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 20th, 2024
Publication Date	March 2024
