

Special Issue on Staphylococcus

Call for Papers

Staphylococcus is a genus of Gram-positive bacteria. Under the microscope, they appear round (cocci), and form in grape-like clusters. Staphylococci bacteria are involved in a variety of diseases and are often responsible for hospital-acquired infections.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **staphylococcus**. Potential topics include, but are not limited to:

- Biological characteristics
- Isolation and identification
- Staphylococcal species
- Genomic research
- Staphylococcal protein
- Antimicrobial resistance
- Pathogenesis
- Staph infection
- Staphylococcal diseases
- Epidemiology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Staphylococcus**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 29th, 2016
Publication Date	May 2016
