

Special Issue on Mycotoxins

Call for Papers

Mycotoxins are toxins produced by some species of mold. They are found throughout a toxic mold colony, and on the spores. The substance a toxic mold colony is growing on affects whether the mold colony produces mycotoxins. Mycotoxins exist as a self-defence for toxic mold colonies. Toxic molds use their mycotoxins as a biological weapon against other organisms.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **mycotoxins**. Potential topics include, but are not limited to:

- Aflatoxin, ochratoxin, zearalenone, trichothecene, etc.
- Mycotoxins in food and agriculture
- Mycotoxin exposure
- Mycotoxin symptoms
- Mycotoxin treatment
- Mycotoxins removing
- Mycotoxins testing

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Mycotoxins**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 30th, 2016
Publication Date	December 2016
