

SSpecial Issue on Helicobacter Pylori

Call for Papers

Helicobacter Pylori (*H. pylori*) is a type of bacteria that causes infection in the stomach. It is found in about two-thirds of the world's population. It may be spread by unclean food and water, but researchers aren't sure. It causes Peptic ulcers and can also cause stomach cancer.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **helicobacter pylori**. Potential topics include, but are not limited to:

- Microscopy, genome and transcriptome
- Adaptation to the stomach's acidic environment
- Inflammation, gastritis, ulcer and cancer
- The cag pathogenicity island
- Survival of *H. pylori*
- Diagnosis, prevention, and treatment
- Prognosis
- Epidemiology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – *Helicobacter pylori***” should be selected during your submission.

Special Issue timetable:
