

## Special Issue on Pathogenic Bacteria

### Call for Papers

**Pathogenic Bacteria** are bacteria which are capable of causing disease. Humans are generally most interested in the species of bacteria which can cause disease in humans, although these bacteria can also infect other animals and plants. Some notable pathogenic bacteria include Streptococcus, Staphylococcus, Tuberculosis, and Escherichia coli, among many others. Worldwide, these bacteria account for many illnesses and disease epidemics.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **pathogenic bacteria**. Potential topics include, but are not limited to:

- Pathogenic bacteria
- Pathogenic disease
- Mechanisms
- Treatment
- Epidemiology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Pathogenic Bacteria**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 20th, 2017
Publication Date	July 2017
