

Special Issue on Anti-microbial

Call for Papers

"Antimicrobial" is a general term that refers to a group of drugs that includes antibiotics, antifungals, antiprotozoals, and antivirals. For example, antibiotics are used against bacteria and antifungals are used against fungi. They can also be classified according to their function. Agents that kill microbes are called microbicidal, while those that merely inhibit their growth are called biostatic.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **anti-microbial**. Potential topics include, but are not limited to:

- Antibacterials
- Antifungals
- Antiprotozoals
- Antivirals
- Infection control
- Antimicrobial resistance

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue – Anti-microbial**" should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 31st, 2017
Publication Date	June 2017
