

Special Issue on Clinical Microbiology

Call for Papers

Clinical microbiology is with the prevention, diagnosis and treatment of infectious diseases. In addition, this field of science studies various clinical applications of microbes for the improvement of health. There are four kinds of microorganisms that cause infectious disease: bacteria, fungi, parasites and viruses, and one type of infectious protein called prion. A medical microbiologist studies the characteristics of pathogens, their modes of transmission, mechanisms of infection and growth.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **clinical microbiology**. Potential topics include, but are not limited to:

- Causes and transmission, treatments
- Microbial culture
- Diagnostic tests
- Infectious diseases
- Clinical pathology
- Antimicrobial drugs
- Immune response

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Clinical Microbiology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 10th, 2018
Publication Date	March 2018
