**Special Issue on**  
**Applied and Environmental Microbiology**  
**Call for Papers**

Environmental microbiology is the study of the composition and physiology of microbial communities in the environment. The environment in this case means the soil, water, air and sediments covering the planet and can also include the animals and plants that inhabit these areas. It also studies their relationship with one another and with their environment.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Applied and Environmental Microbiology**. Potential topics include, but are not limited to:

- Microorganisms and environmental impacts
- Microbial ecology and community
- Water/soil quality and microbiology
- Degrading bacteria
- Ecological implications of virus and bacteria
- Plant pathology and microbiology
- Microbial technology and agricultural science

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Applied and Environmental Microbiology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 30th, 2019
Publication Date	December 2019
