

## Special Issue on Bacteriology

### Call for Papers

Bacteriology is the branch and specialty of biology that studies the morphology, ecology, genetics and biochemistry of bacteria as well as many other aspects related to them. This subdivision of microbiology involves the identification, classification, and characterization of bacterial species.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Bacteriology**. Potential topics include, but are not limited to:

- Identification, classification, and characterization
- Molecular and cell biology
- Bacterial ecology
- Bacterial genetics
- Bacterial metabolism
- Bacterial disease
- Pathogenic bacteriology
- Germ theory
- Klebsiella pneumonia
- Salmonella enterica
- Staphylococcus epidermidis
- Bacterial biofilms
- Public health
- Industrial bacteriology
- Applied bacteriology in agriculture and environment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Bacteriology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 11th, 2023
Publication Date	September 2023

**Scientific Research**  
*Open Access*

**Advances in Microbiology**

**ISSN Online: 2165-3410**
