

## Special Issue on Bacteriology

### Call for Papers

"Bacteriology" is the branch of microbiology that deals with the study of bacteria, their characteristics, classification, and their role in both health and disease. Bacteriology is an important discipline in the medical and biological sciences, with applications in areas such as public health, medicine, biotechnology, and environmental science. Understanding bacteriology is crucial for developing effective strategies to control and prevent bacterial infections and diseases.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Bacteriology**. Potential topics include, but are not limited to:

- Bacterial taxonomy and classification
- Bacterial physiology and metabolism
- Bacterial pathogenesis and host-pathogen interactions
- Antibiotic resistance and control of infections
- Bacterial ecology and environmental microbiology
- Public health
- Industrial bacteriology
- Applied bacteriology in agriculture

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Bacteriology**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 9th, 2024
Publication Date	March 2024
