

Special Issue on Global Interconnectedness and Education

Call for Papers

Education is becoming increasingly international. The most represented case is the spread of mass schooling. Mass schooling has implanted the fundamental concepts that everyone has a right to be educated regardless of his/her cultural background and gender differences. The system has also promoted the global rules and norms of how the school should operate and what is education. Though the system can have variations in local, regional, and country level, the similarities — in systems or even in ideas — that schools share also enable the exchange among students at all levels which are also playing an increasingly important role in globalization process. In Europe, for example, the Socrates-Erasmus Program stimulates exchanges across European universities. Also, the Soros Foundation provides many opportunities for students from central Asia and eastern Europe. Programs such as the International Baccalaureate have contributed to the internationalization of education. Some scholars argue that, regardless of whether one system is considered better or worse than another, experiencing a different way of education can often be considered to be the most important, enriching element of an international learning experience. The global campus online, led by American universities, allows free access to class materials and lecture files recorded during the actual classes. This facilitates the globalization of education.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Global Interconnectedness and Education**.

Authors should read over the journal's [Author's Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue-Global Interconnectedness and Education**” should be chosen during your submission.

According to the following timetable:

| | |
|------------------|--------------------|
| Manuscript Due | January 25th, 2013 |
| Publication Date | March, 2013 |

Editor-in-Chief

Dr. Stephen Rushton

University of South Florida Sarasota-Manatee, USA
