

Special Issue on Medical Education and Health Education

Call for Papers

Medical Education and Health Education encompass the teaching and learning of medical and health-related knowledge, skills, and attitudes. Medical Education focuses on training healthcare professionals, while Health Education promotes health literacy and empowers individuals to make informed decisions about their well-being. Both disciplines are crucial for improving healthcare services, public health, and the development of competent professionals.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Medical Education and Health Education**. Potential topics include, but are not limited to:

- Curriculum development
- Instructional methodologies and techniques
- Clinical skills training and simulation
- Education and information technologies
- Medical education and healthcare systems
- Public health education
- Health knowledge, behaviors and attitudes
- Patient education and health promotion
- Nursing education and professional development
- Education for health and well-being
- Health education and sustainable development
- Innovations in medical education

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Medical Education and Health Education**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 1st, 2024
Publication Date	April 2024
