

Special Issue on Herbal Medicine

Call for Papers

Herbal Medicine is an academic topic that focuses on the use of medicinal plants and their extracts for therapeutic purposes. It involves studying the active compounds present in herbs, their mechanisms of action, and their potential benefits for treating various health conditions. This field explores traditional herbal practices from different cultures, as well as modern scientific approaches to understanding the efficacy, safety, and interactions of herbal remedies. Herbal Medicine plays a role in complementary and alternative medicine, and it aims to provide evidence-based insights into the potential healing properties of plants.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Herbal Medicine**. Potential topics include, but are not limited to:

- Pharmacognosy
- Phytochemistry
- Ethnobotany and traditional medicine
- Herbal medicine in chronic disease management
- Pharmacology
- Herbal formulation and dosage
- Herbal pharmacokinetics
- Clinical herbal medicine
- Herbal toxicology
- Herbal quality control and drug safety
- Herbal drug interactions
- Drug development

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Herbal Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 13th, 2024
Publication Date	May 2024
