

Special Issue on Structural and Civil Engineering

Call for Papers

Civil engineering is considered the second-oldest engineering discipline, with military engineering considered the oldest. Civil engineering is a professional discipline that deals with the design, construction and maintenance of the physically and naturally built environment, especially public sector works such as roads, bridges, dams, highways, airports, pipelines, sewage and drainage systems, railways, ports and all the rest. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **structural and civil engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **structural and civil engineering**. In this special issue, potential topics include, but are not limited to:

- Latest developments in building and bridge structures
- Geotechnical engineering
- Bridge engineering
- Hydraulic and coastal engineering
- Coastal engineering and transport engineering
- Geotechnical and underground engineering
- Structural mechanics analysis
- Building design theory
- Building construction techniques

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Structural and Civil Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 20th, 2024
Publication Date	April 2024
