

Special Issue on Power Systems and Power Electronic Circuits

Call for Papers

The capabilities and economy of power electronics system are determined by the active devices that are available. Their characteristics and limitations are a key element in the design of power electronics systems. Power electronic devices may be used as switches, or as amplifiers. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Power Systems and Power Electronic Circuits**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Power Systems and Power Electronic Circuits**. In this special issue, potential topics include, but are not limited to:

- Power electronic circuit analysis techniques
- Power electronic circuit design
- Modeling of power electronic circuit
- Testing of power electronics systems
- Devices, switching circuit analysis techniques
- Power electronics applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Power Systems and Power Electronic Circuits**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 26th, 2024
Publication Date	June 2024
