Special Issue on

Internet of Things (IoT) and Smart Systems

Call for Papers

Research on the Internet of Things (IoT) and Smart Systems involves studying the integration of physical devices, sensors, actuators, and network connectivity to enable the exchange and analysis of data. This field aims to develop intelligent systems that can automate tasks, improve efficiency, and enhance decision-making processes. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Internet of Things (IoT) and Smart Systems** .

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Internet of Things (IoT) and Smart Systems**. In this special issue, potential topics include, but are not limited to:

- Sensor networks
- Data analytics
- Communication protocols and network infrastructure
- Security and privacy
- Energy efficiency
- Human-computer interaction
- Applications and use cases

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Internet of Things (IoT) and Smart Systems***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 30th, 2024
Publication Date	June 2024
