## **Energy and Power Engineering**

**ISSN Online: 1947-3818** 

## **Special Issue on Wind Energy**

## Call for Papers

Wind Energy is a renewable energy with many advantages, such as, widely distributed, clean, and mitigate the greenhouse effect. Wind power is very consistent from year to year but has significant variation over shorter time scales. It is very important for human to use wind energy effectively. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of wind energy.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **wind energy**. In this special issue, potential topics include, but are not limited to:

- Wind energy utilization
- Wind power generation
- Wind energy storage
- Wind turbine research
- Wind energy density
- Wind energy resources development

Authors should read over the journal's <u>Authors' Guidelines</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** - *Wind Energy*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 18th, 2014
Publication Date	October 2014

## **Guest Editor:**

Prof. Fermín Mallor

Public University of Navarre, Spain
