

Special Issue on Hydrogen Energy

Call for Papers

Hydrogen is considered to be an ideal energy carrier in the foreseeable future. It can be produced from water by using a variety of energy sources, such as solar, nuclear and fossils, and it can be converted into useful energy forms efficiently and without detrimental environmental effects. Hydrogen can be used as a fuel in furnaces, internal combustion engines, turbines and jet engines. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **hydrogen energy**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **hydrogen energy**. In this special issue, potential topics include, but are not limited to:

- Hydrogen economy
- Hydrogen fuel
- Hydrogen storage
- Hydrogen vehicle
- Application of hydrogen energy
- Hydrogen Generation

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Hydrogen Energy**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 18th, 2015
Publication Date	August 2015

Guest Editor:

Prof. **Fermín Mallor**

Public University of Navarre, Spain
