

Special Issue on Energy Consumption and Conservation

Call for Papers

Energy consumption is the consumption of energy or power used by all of human civilization. Energy conservation refers to reducing energy consumption or going without a service to save energy. With the development of industrialization and urbanization, rising energy use and increasing emissions. Our best weapon against global climate is to promotion energy conservation technology such as nuclear power, photovoltaic industry, smart power grids, and new energy vehicle. These are the solution that will reduce the impacts on our climate, and economic growth.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **energy consumption and conservation**. Potential topics include, but are not limited to:

- Energy consumption measurement
- Energy consumption pattern
- Energy consumption and economic growth
- Energy conservation technology
- Energy conservation and emission reduction

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Energy Consumption and Conservation**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 28th, 2016
Publication Date	March 2016
