

Special Issue on Renewable Energy

Call for Papers

Renewable energy is energy produced from sources that do not deplete or can be replenished within a human's life time. The most common examples include wind, solar, geothermal, biomass, and hydropower. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Renewable Energy**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Renewable Energy**. In this special issue, potential topics include, but are not limited to:

- Wind power
- Hydropower
- Solar energy
- Geothermal energy
- Biomass conversion
- Wave, tide and ocean thermal energies
- Hydrogen production technology and fuel cells
- Integration into the energy system
- Market and industry trends

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Renewable Energy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 12th, 2024
Publication Date	May 2024
