TABLE OF CONTENTS

Volume 1 Number 1

March 2012

Falling-Incident Detection and Alarm by Smartphone with Multimedia Messaging Service (MMS)

Y. He, Y. Li, C. Yin 1

Energy-Constrained Duty-Cycle Optimization for Wireless Implanted Communication Devices

Z. Xu, Y. Li 6

MobiHealthcare System: Body Sensor Network Based M-Health System for Healthcare Application

F. Miao, X. L. Miao, W. H. Shangguan, Y. Li 12

E-Health Telecommunication Systems and Networks (ETSN)

ETSN is an international refereed journal dedicated to publishing state-of-the-art research in the field of e-health applications in telecommunication systems and networks. The journal focuses on systems, algorithms, and applications of e-health and medical telecommunications. ETSN publishes original research as well as review papers in the following areas:

- Biomedical communications
- Biomedical sensors and instrumentation
- Biomedical signal processing
- Body area and sensor networks
- Collaborative technologies in e-health and telemedicine systems
- E-health and m-health systems
- Healthcare applications
- Security and privacy issues of e-health systems
- Wearable sensors and systems
- Wireless communications and mobility

We are also interested in: 1) Short Reports – 2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews – Comments and critiques.
