

## Special Issue on Fisheries, Aquaculture and Environment

### Call for Papers

**Fishery** is an entity engaged in raising, harvesting and processing fish in inland waters or seas. In our daily life, aquatic products from fish farming or aquaculture provide lots of essential nutrition, and according to the statistics, over 500 million people in developing countries make a living on **fishery** or **aquaculture**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **fisheries, aquaculture and environment**. Potential topics include, but are not limited to:

- Fish growth rate, maturity, size and uniformity
- Fish behavior, physiology, reproduction and genetics
- Fish & shellfish disease, health and safety
- Ecological modeling
- Fishing industries
- Environmental effects on fishery and aquaculture
- Fishing & marine ecosystem
- Seafood & human health

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Fisheries, Aquaculture and Environment**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 25th, 2015
Publication Date	August 2015
