

Special Issue on Food Packaging, Preservation and Shelf-life

Call for Papers

Packaging technology, such as modified atmosphere packaging (MAP), and traditional methods, such as brine treatment, salting and smoking, remain important in food production and preservation. **Shelf life** is an important property of any food and is of interest to everyone in the food chain from producer to consumer.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **food packaging, preservation and shelf-life**. Potential topics include, but are not limited to:

- Food packaging materials and technologies
- Modified atmosphere & active packaging
- Edible packaging
- Food package test and shelf life test
- Food-packaging interaction
- Factors influencing shelf life
- Food safety and shelf life

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Food Packaging, Preservation and Shelf-life**” should be selected during your submission.

Special Issue timetable:
