

Special Issue on Antioxidants in Foods

Call for Papers

Antioxidants play an important role in overall health. They are natural compounds found in some foods that help neutralize free radicals in our bodies. Free radicals are substances that occur naturally in our bodies but attack the fats, protein and the DNA in our cells, which can cause different types of diseases and accelerate the aging process.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **antioxidants in foods**. Potential topics include, but are not limited to:

- Antioxidant-rich foods
- Free radicals and antioxidant
- The role of oxidative stress in the pathophysiology
- Health effects of antioxidant
- Antioxidants and disease prevention
- Antioxidant supplements
- Potential hazards of antioxidants
- Exploitation of natural antioxidants
- Practical applications

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Antioxidants in Foods**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 26th, 2016
Publication Date	January 2017
