

## Special Issue on Beekeeping and Bee Product

### Call for Papers

Honeybees provide a wide range of benefits to humans from honey, other bee products, pollination of food crops and ecological services. Beekeeping is practiced around the world, and can provide a valuable source of income to people in developing regions with relatively little investment.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **beekeeping and bee product**. Potential topics include, but are not limited to:

- Beekeeping
- Honey, propolis, royal jelly, etc.
- Production, nutrition and health
- Bee product quality assessment
- Honey authenticity
- Physicochemical and functional properties
- Therapeutic application

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Beekeeping and Bee Product**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 30th, 2017
Publication Date	July 2017
