

Special Issue on Functional Foods and Nutraceuticals

Call for Papers

Functional foods and nutraceuticals have the common characters of general foods that they can provide nutrition and energy to sustain life. But functional foods and nutraceuticals also can regulate the function of human body and are defined dietary foods that prevent or reverse a diseased state. Increasing public awareness of the link between diet and health has propelled the consumption of these foods to unprecedented levels, particularly in countries where the population is aging and health care costs are rising. Driven by market demand and technological progress, the development space of functional foods and nutraceuticals industry is huge.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **functional foods and nutraceuticals**. Potential topics include, but are not limited to:

- Types of functional foods and nutraceuticals
- Enriched foods
- Dietary supplements
- Health-promoting additives
- Functional ingredients in food
- Regulations and health claim
- Functional evaluation of health food
- Development of functional foods and nutraceuticals

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Functional Foods and Nutraceuticals**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 20th, 2019
Publication Date	April 2019
